Thanks, Chris. Per our last conference call on Area 40, I had 17 June reserved for the community meeting, not 18 July. I have to be in DC 16-19 July. No need to change it on account of me though, unless you think that's important. I am happy to select June 17. I thought we needed to confirm with Janis and wanted it to piggy back a CAG meeting. Please confirm June 17 works for you and I will change the mailer book the room.

Here are a few comments for your consideration:

Mailer

- Typo in "Unit" in 1st paragraph. Done.
- Raptor perches and owl boxes should both be plural, as they are in the fact sheet. Will change fact sheet. Design includes 1 of each.
- I think you should clarify the bulleted text on groundwater treatment system to be "subsurface" so people don't expect to see a typical above ground treatment plant built on site. It is clarified this way in the drawing key. Done
- The most frequently asked question I've seen asked about this cleanup is in regard to ambient air sampling during and after cleanup. I think it would be a good idea to add a bullet indicating AR will be performing air sampling during and after cleanup to ensure the air is safe for the community and future proposed use Added "Ambient air, soil vapor, and groundwater monitoring will commence following each phase of remedy and continue until cleanup objectives are achieved."

Fact Sheet:

- I still disagree that contamination exists only on AR property. I think saying it flows toward and on the AR-owned facility is a more accurate statement. The statement is "...soil and groundwater contamination from Area 40 OU-10 exists only

within Aerojet Rocketdyne, Inc. owned property.” Where does Area 40 contamination exist outside of AR owned property? I assume you are concerned with groundwater. RAP figures 13, 14 and 17 show the extent of the TCE and perchlorate plumes and that there are wells between the plume and the property boundary where neither are detected. - It sounds confusing to mention participation in the PP process on here since it will be after the clean up in about two years. Suggest deleting that statement or specifying that PP will happen after RAP cleanup.

Thank you,
Lynn

Thanks Jackie! Attached are the revised versions of the mailer and fact sheet in .pdf format. The mailer would be printed double sided and folded in half. Please take a final look. I can bring a copy of the printed version of the mailer to the CAG meeting next week.

In your March 29, 2019 e-mail, you mentioned that you wanted me to develop an e-mail for you to review and then send to Christine Brainerd. I prepared the fact sheet instead. I will send her this fact sheet and follow up with a call. We should probably schedule a meeting with Christine to go through the project. I will obtain her availability for the meeting (maybe May 16 – day after CAG?)

We also need to determine when the deadline is to have announcements submitted for the June 4 City Council meeting.

If we are all good with July 18, I will have Carole reserve a room at the Community Center. Unless you would prefer to hold off on that until after the CAG meeting?

Let me know if you are ok with the above and I will get things rolling.

Importance: High

Dear Chris:

Thank you for moving this whole project forward. Here are Daewon and my comments on the files you sent. Lynn is on travel and may weigh in on her return.

In addition, I got an email from Janis and she wants someone to present any Area 40 cleanup updates and talk to about the outreach plan for the community workshop. I would rather you give an update on the Area 40 cleanup efforts and I can talk briefly about the communication outreach plan for the workshop. I can send my talking points for everyone's review. Let us know if this is ok with you asap. Janis wants to finalize the May CAG agenda.

FYI, Jackie

Subject: Folsom Mailer

Hi Jackie, Lynn, and Daewon – Attached is the draft mailer we discussed during our conference call a few weeks back. It is intended to be a cardstock 8.5x11 sheet of paper, folded in half to make four roughly 8.5x5.5 pages. The cover will be the address page. The back will be agency contact information (note: I inserted Peter and Tammy from the prior public notice, but feel free to change if you like). The inside will have the figure on the top and the text information on the bottom.

This would be sent to the mailing list we discussed previously (4,000+ addresses) about 2 weeks prior to the public meeting. Do you have a date in mind? Perhaps July 18, the evening after the standard Agency technical meeting.

Please review and comment.

I have also attached a revised version of the Area 40 OU-10 fact sheet to provide to the City of Folsom. This has been revised based upon your comments. There are a couple of items I did not change and included comments to explain. Please review and comment on this document as well.

Thanks! Chris
